SCAN ME

This is an outsourced function where a team from Keycon Consulting are sent to the client's premises to help them in verifying if the assets recorded on the fixed assets register are physically available on the premises.

PLEASE NOTE: External auditors will always sample the Assets on you register during verification. Keycon Consulting team will carry 100% Physical verification by visiting all the sites where assets are located to confirm existence, completeness, and ownership.

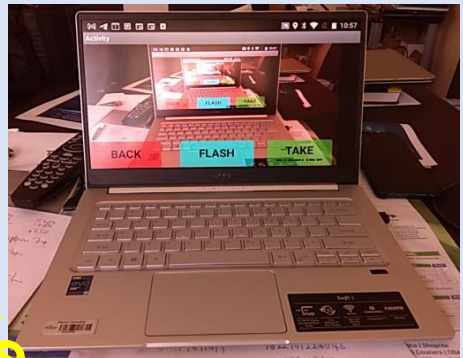

Benefits of Asset Tagging and Asset Verification

Benefits

- By using Barcodes or RFID technology an organisation will be able to **speed up** asset verification
- Charge the right **depreciation** for Tax Purposes
- Eliminate **ghost assets** to cut down on insurance and maintenance costs.
- Minimize **discrepancy** between physical assets and financial records.
- **Real-time** fixed asset tracking to prevent theft, pilferage, equipment failure, and downtime.
- Easy and fast monitoring of asset **movement** between locations.
- It is a statutory requirement and to be **compliance** as per IAS 16
- Confirm asset **ownership**.
- Asset life extension and improved **visibility** on asset availability, condition, maintenance, replacement, and asset performance management.
- Verification is done to help **detect** misused or stolen assets.

Bottom Line:

- Let your staff focus on their core competencies and trust Keycon to do what it does best – Asset Data Capture, Verification and Tagging.
- We capture the vital information about any and every asset type from computers to trees and everything in between.
- We will find assets you never knew you had as well as identify assets you thought you had but no longer exist or are obsolete.
- We will create a range of savings many times the value of your investment in the audit service performed by Keycon.

Conclusion

With the asset management software, you can easily overcome all the challenges mentioned. It comes with cloud technology which means you can access it from anywhere and you will not have to worry about data security & a cloud service provider will take care of your data.

Know:

- Where your assets are
- Who they are issued to
- What condition they are in
- What you have but not on your register
- What you don't have but are on your register
